## Disclaimer

This program is designed to predict the blood platelet count. It sets a guideline for the prognosis. This software is currently in Beta test and is in

no way intended and or to be used as a diagnosis. There are several factors affecting the patient's condition including but not limited to viral load, NS1 antigen, primary/secondary infection, cytokines and physical activity. Some factors cannot be accounted for and hence certain uncertainties can be introduced in calculations. We recommend this program be used as a guideline. If you feel uncomfortable/unwell at any time, please seek medical help.
